

ENGAGEMENT REPORT

CCP Project Enablement Ltd

Las Fach, New Mill

Carmarthenshire · SA33 4HY

hello@housecomply.co.uk

Client: Stephen Kirkwood — Island House Restoration Ltd · **Period:** 8–23 July 2026 · **Consultant:** Dominic Pullen ·
Ref: accompanies INV-2026-002

Overview

Over 8–23 July 2026 CCP Project Enablement delivered an intensive build-and-strategy programme across your ventures — The Globe and its branches, Island House, Sancler Property, the House of Culture, and a new Food Production stream. What started as a single decision-support portal has grown into a working multi-business operating system: live public websites, a verified research spine, financial models built from real trading data, and a governed publishing workflow. This report sets out what has been delivered and pushed live, how the direction has evolved, where we are heading, and the hours logged.

Delivered & pushed live

The Globe

- Brand and public website built and live at **theglobe.wales** (own repo + Vercel, auto-deploying).
- Restaurant/wine-bar, bakery (rebuilt on high-res photography), and coffee proposition sections.
- Seasonal Cook Book (36 dishes, costed) and drinks library; turnaround / break-even model from real sales.
- Native compliance section, plus a daily content engine and staff photo-drop feeding social channels.

Island House

- Town-wide Laugharne history programme on a verified chain-of-custody research base (nothing published as fact unless sourced).
- Interactive History Trail grown to 30 stops; 360 walkthrough set-up; book-grade sourced claim ledger.
- Dedicated site stood up and deployed.

Sancler Property

- Faithful site rebuilt on our own systems and deployed live (GitHub + Vercel).
- Enquiry back-end and buyer-profile analysis; drone photography planned and flown; live-site defect list surfaced.

House of Culture

- Dylan-themed town-trail app taken from concept to tested, running software.
- Full business plan, experience/economics model, and a clear IP/rights position.

Food Production & cross-cutting

- Regenerative-farming knowledge base, enterprise economics, and a first Globe fresh-supply crop plan at 100 covers/week.
- Decision portal turned into a working dashboard (work log, business section, decisions).
- Three-CEO desk structure with a cross-desk orchestration layer; consolidated, verified data register.

How the direction has evolved

- From a **decision portal** → a full multi-business **operating system**.
- From one shared page → **separately-deployed live public sites** per venture.
- From ad-hoc notes → a **verified research chain-of-custody**.
- Governance matured after real incidents (a base fork, a frozen deploy) into written rules — **two repos** (public vs internal), a **single-publisher** rule, and **one register**.

Where we are heading

- The Globe: trading improvements and the content engine running; chef search and local SEO opened.

- Sancler & Island House: sites toward their real domains once privacy and heritage content are cleared.
- House of Culture: the trail app toward a place-based launch.
- Food production feeding the Globe kitchen on a seasonal supply plan.

Hours worked & logged

Time is logged daily to the live work register. On days where several workstreams ran in parallel, hours are counted as the single longest concurrent working day, not summed. Full logged time across the period:

Day	Hrs
8–10 Jul (kick-off)	12
11 Jul	7
12 Jul	6
13 Jul	9
14 Jul	9
15 Jul	12.5
16 Jul	11
17 Jul	9
19 Jul	3
20 Jul	9
21 Jul	8.5
22 Jul	17
23 Jul	20
Total (13 working days)	133

Billing note: although 133 hours across 13 days were logged, this engagement is invoiced at the agreed day rate for **10 days only** (INV-2026-002). The additional time is recorded here in full for transparency and reflects the intensity of the build phase, at no extra charge.
